

# CURRICULUM VITAE

## Personal Details

**Name:** Ezekiel Kibiego  
**Occupation:** Software Developer  
**Phone Number:** +254722991833  
**Email Address:** [kibiezekiel@gmail.com](mailto:kibiezekiel@gmail.com)  
**Citizenship:** Kenyan  
**D.O.B:** 25th April 1993

## Professional Summary

A self-motivated energetic individual capable of innovative thinking in a team environment, I have demonstrated the ability to continually learn, work independently, and make decisions with minimal supervision through the various projects undertaken as well as positions held. I come with an analytical mind, problem-solving aptitude, and the ability to juggle multiple projects at one time. Also very skilled in programming, agile mind, operating Linux systems, and proficient in Microsoft Excel.

## Professional Experience

### **Personal Project — *Store-Centre***

[https://github.com/ezekielkibiego/Store\\_Centre](https://github.com/ezekielkibiego/Store_Centre)

Jan. 2022 - Feb 2022

Used Python-Django and Javascript to build an app that allows a user to book a storage facility, anticipate the time of use of the facility as well as facilitate the transportation of goods to and fro the warehouse at a price depending on the distance.

### **Personal Project — *News Hub***

<https://github.com/ezekielkibiego/News-Hub>

Dec 2022- Jan 2022

Used Python-Flask to build an app that allows a user to read news from top news sources around the world with a click of a button. the user can choose from a wide range of sources, from general, entertainment, business, and even sports.

## Personal Project — Github Search

<https://github.com/ezeielkibiego/Github-Search>

Oct 2022 - Oct 2022

Used Angular to build a GitHub Search application that displays GitHub user data and then allows one to search any GitHub user and Repositories to see given information about that User or a repository(s).

## Personal Project — Hot Pizza Paradise

<https://github.com/ezeielkibiego/Github-Search>

Oct 2022 - Oct 2022

Used Javascript to build an application that allows a user to order pizza, specify the size, toppings, and quantity as well as indicate whether or not the pizza is to be delivered. The application also calculates the total cost of a user's order.
