PROJECTS

The Neighborhood

December 2021 | Python, Django, javaScript, HTML, CSS, heroku

Code:https://github.com/ezekielkibiego/The_Neighborhood

This is a Web Application that allows users, after signing in, join a neighborhood as well as add a neighborhood, add businesses and update posts on the occurrences of different neighborhoods.

News-Hub

Oct 2021 | Python, Flask, HTML,CSS, Heroku

Code:https://github.com/ezekielkibiego/News-Hub

This is a News Hub application that consumes News Api hence the user is able to read news from top news sources around the world by a click of a button.

Github-Search

2021| Angular, Typescript,Javascript,HTML,CSS

Code:https://github.com/GDG-GANDHINAGAR/devfest-19

This is a GitHub Search application that displays GitHub user data and then allows one to search any GitHub user and Repositories to see given information about that User or a repository(s).
